Mazak Certifies DP Technology as Newest VIP Partner

Florence, Kentucky, June 3, 2013 – Mazak has announced the certification of DP Technology Corporation, a leading developer and supplier of computer-aided manufacturing (CAM) software, as the newest member of its Value Inspired Partners (VIP) technology program. DP Technology is well known for its flagship product ESPRIT, a high-performance, full-spectrum programming system for milling, turning, wire EDM and multi-tasking machine tools.

Stemming from Mazak's commitment to provide more comprehensive solutions to manufacturers, the VIP program brings together producers of complementary technologies to create more innovative products and turnkey processes. Collaborating on R&D and integration efforts, the VIP program fosters a high level of cooperation and technological integration that moves well beyond individual pieces of equipment. The program also fuels development of comprehensive training solutions for manufacturers across all market segments.

"We are pleased to welcome DP Technology as the newest member of our VIP program," said Brian Papke, president of Mazak Corporation. "The company has shown itself to be a very proactive collaboration partner and one that represents the values of the VIP program. We believe DP Technology's passion for excellence and innovation will continue to be a valuable asset to the enhanced performance of our machine tools, as well as to our customers' success."

The ESPRIT system offers powerful, high-performance programming for any CNC machine tool, and CNC programmers value it for its extensive suite of machining cycles, comprehensive tool control, and capacity to fully support an entire shop. Many of Mazak's customers, particularly those with 5-Axis and Multi-Tasking machines, already benefit from the system, as it allows them to optimize post processing and programming to achieve the highest possible productivity from their machine tool investments.

"It is an honor to be a part of the Mazak VIP technology program," said Dan Frayssinet, CEO of DP Technology Corporation. "We are very excited and eager to continue working with Mazak and its customers to expand their manufacturing capabilities with ESPRIT and our other technical innovations. Like Mazak, DP Technology is committed to technical excellence and continues to dedicate significant amounts of time and money into ongoing research and product development, particularly in regards to 5-axis

and multi-tasking machine operations. This allows U.S. manufacturers to further increase productivity and remain ahead of the competition.”

DP Technology maintains its worldwide headquarters in Camarillo, California, with product development teams in California, Berlin, Germany and Florence, Italy. Sales and support operations are located in Europe, Asia, and North and South America.

Members of the VIP program work with Mazak in product development and the creation of training events and seminars spanning a broad range of topics. For more information on the Mazak VIP program and DP Technology, please visit MazakUSA.com/VIP.

About Mazak Corporation

Mazak Corporation is a leader in the design and manufacture of productivity-improving machine tool solutions. Committed to being a partner to customers with innovative technology, its world-class facility in Florence, Kentucky, produces over 100 models of Turning Centers, Multi-Tasking Machines and Vertical Machining Centers, including 5-Axis models. Continuously investing in manufacturing technology allows the Kentucky plant to be the most advanced and efficient machine tool builder, providing high-quality and reliable products through its “ Production-on-Demand” manufacturing practice. Mazak maintains eight Technology Centers across North America to provide local hands-on applications, service and sales support to its customers. For more information on Mazak's products and solutions, visit www.mazakusa.com or follow us on Twitter at @MazakCorp and on Facebook at <http://www.facebook.com/MazakCorp>.
